Onion Jack

The Onion Jack creates an anchor point for prestressing cables. The unit forms an onion shape to the end of the cable by spreading and separating the individual wires thus forming the onion shape on the strand ends.

A heavy duty machine, yet still lightweight and portable. Can also be used with hand pumps. By using this Onion Jack you eliminate the need for anchor plates or barrel/wedges.

Specifications

Strand (mm):- Ø12.7 or Ø15.2

Capacity:- 10T @ 10,000 P.S.I.

Weight:- 10kg

Size (mm):- 410 x 150 x 75 (handle upto 150 high)
